Professional Summary

Chemical Engineering undergraduate at Thapar Institute of Engineering and Technology with hands-on experience building Python-based Generative AI applications, semantic retrieval pipelines, and image-based visual search systems. Familiar with LLMs, RAG, embeddings, vector similarity search, data preprocessing, and API development; interested in applying AI and machine learning to real-world engineering problems.

Education

Thapar Institute of Engineering and Technology, Patiala — Aug 2023 – May 2027
B.Tech in Chemical Engineering — *Patiala, Punjab*

Convent of Jesus and Mary School — 2023
Class XII (CBSE), 90% — *Ambala, Haryana*

Technical Skills

Programming: Python, SQL
AI & Machine Learning: LLMs, Retrieval-Augmented Generation (RAG), embeddings, semantic search, vector similarity search, prompt engineering, machine learning fundamentals
Libraries & Frameworks: FAISS, LangChain, Sentence Transformers, FashionSigLIP, FastAPI
Data Processing: Pandas, NumPy, Matplotlib, exploratory data analysis, feature engineering, data preprocessing, statistical analysis
Tools & Databases: Git, GitHub, Jupyter Notebook, VS Code, PyCharm, PostgreSQL, Supabase, n8n

Experience

Generative AI Engineering Intern | Intigate Technology Pvt. Ltd., Noida — Jul 2026 – Present
- Develop Python-based Generative AI applications using LLMs, Retrieval-Augmented Generation (RAG), embeddings, and PostgreSQL for document retrieval, data validation, and workflow automation.
- Build semantic and multimodal visual-search pipelines using FAISS, image embeddings, and object detection to retrieve relevant items from document and fashion-product catalogues.
- Support AI application integration, debugging, workflow testing, and data validation to improve reliability across application workflows.

Lead UI/UX Designer Intern | Campus Connect Startup — Jan 2025 – Jun 2025
- Led UI/UX design and branding for a mobile application published on Google Play; designed campaigns for 10+ campus events, contributing to a reported 25% increase in user engagement.

Selected Projects

AI-Powered Textile Visual Search | GitHub | *Python, FashionSigLIP, FAISS, FastAPI*
- Developed an image-based retrieval pipeline that generates FashionSigLIP embeddings and uses FAISS vector similarity search to retrieve and rank visually similar textile products from a catalogue.
- Exposed the retrieval pipeline through a FastAPI backend for image-based product search.

Telco Customer Churn Analysis | GitHub | *Python, SQL, EDA*
- Analyzed 7,000+ telecom customer records using Python and SQL; applied exploratory analysis and feature engineering to identify patterns associated with customer churn.

Bank Loan Analytics Dashboard | GitHub | *Power BI, DAX, Power Query*
- Built an interactive dashboard analyzing 38,576 loan applications, with KPIs and drill-downs for portfolio performance, approval trends, repayment metrics, and loan quality.

Certifications & Coursework

Generative AI Software Development (IBM) | GenAI and Azure API Management (Microsoft) | Prompt Engineering & GitHub Copilot Agent Mode (Microsoft) | Data Science Bootcamp (Udemy/365 Data Science)
Relevant coursework: Statistics, Database Management, Machine Learning, Data Analytics

Leadership & Activities

- **Convenor, Thapar Debating Society:** Coordinated inter-college events involving 50+ participants, speakers, and organising teams.
- **Executive Board Designer, AIChE:** Created promotional and branding materials for technical events and chapter activities.
- **Sustainability Hackathon:** Conducted feasibility analysis and presented a waste-cooking-oil-to-biodiesel concept to an inter-college judging panel.
